GHA

In response to request from policy officers in the Department of State, we have prepared an analysis of CIA funding authorities as they relate to legislative restrictions imposed by Congress on appropriated funds. We realize that in view of our lack of experience with the subject our understanding may well be seriously deficient. We would, therefore, appreciate any corrections or amplifications that you would care to provide. Should you wish to discuss the matter with someone in this office, Stanley Futterman, extension 63-23039, would be an appropriate person to contact.
